

## **PhD Forensic Epidemiology**

MSIC is partnering with the department of Epidemiology to offer a 4 year parttime executive PhD programme in Forensic Medical Sciences with a Forensic Epidemiology Focus

The PhD will be embedded in the Care and Public Health Research Institute (CAPHRI). CAPHRI is one of Maastricht University's largest and oldest schools with a track record to high quality. The institute attracts top scientist from around the world and offers comprehensive PhD training programme for professionals.

The topic of the PhD thesis will be tailor made to fit with the work experience of the candidate. This PhD opportunity involves distance-learning. For a MSIC discounted tuition fee of 2000 EUR per year, students are offered access to university facilities, access to selected courses, supervision by forensic experts, and an additional diploma degree in Forensic Medical Sciences (dipFMS).
