Presentation App
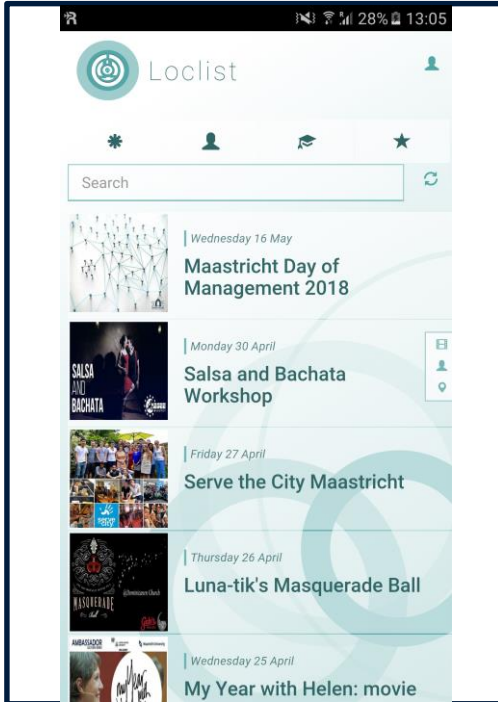

Name of team: *Loclist*

Send filled in format to:
appchallenge@maastrichtuniversity.nl
Deadline: Friday April 20 14.00

Maastricht University

Screenshot 1	Screenshot 2	Info about app

1. Loclist is a digital app that centralizes information and notification of events occurring in/from Maastricht. The app provides access to internal and external activities across the faculties.

2. Both platforms allow for a person student or faculty member to be a host or a guest.

3. When you function in your host account, after successfully verifying our user-friendly security requirements you unlock the option to post about an event you or your organisation wants to host.

4. When you sign in as a guest have access to the list of different cross-faculty events

5. The Check-in function is a function that allows guests to register their attendance at events in real time. This assists hosts to track the demographics and student interest that their events appeal to. It is also targeted at addressing the issue on registration in mandatory activities within the university. A simple swipe and we know who and how many students attended.

6. A point system ensures incentives for both hosts and guests and provides access to a number of in-app purchases.
