

Strengthening EU Environmental Law: Legal Perspectives on Greening Europe

This lecture will be delivered by

**Dr. Annalisa Volpato and
Prof. Dr. Ellen Vos**

The institutional architecture of EU environmental governance

8 February 2024 | 4:00 PM – 5:30 PM CET

Abstract

EU environmental law and policy-making is characterised by a plurality of institutional actors. While the Commission remains a central policy-maker, EU agencies play an increasingly important role in a number of environmentally sensitive domains. Although the European Environment Agency is the decentralised agency whose mission is most evidently related to the EU environmental policy, also other EU agencies contribute to the achievement of the EU environmental protection objectives, especially within the European Green Deal. By mapping and discussing the different tasks attributed to EU agencies in this respect, this lecture analyses the role of EU agencies in environmental law and policy, and the way they contribute to integrating environmental concerns in EU governance and administration.

Bio

Dr. Annalisa Volpato

Annalisa Volpato is Assistant professor in European law at the University of Padova
