CAPHRI|chs Workshop

24 APRIL 2024 (ONLINE)

Challenges of the use of artificial intelligence in scientific teaching and publishing

DATE & TIME   24. April 2024 | 15:00-17:00 CET

PLACE   Online

PROGRAM   AI in teaching assignments

Dr. Ghislaine van Mastrigt (Assistant Professor, Maastricht University). Discussant: *Prof. Svenja Caspers* (Vice Dean for Teaching and Academic Quality, Medical Faculty and University Hospital Düsseldorf). Short presentation followed by discussion: AI is being used by researchers and students. Much of our teaching is based on learning how to write. But what do we do if AI is doing most of the writing; which assignments are most affected and how should we change our teaching assignments to meet our learning goals?

AI in journal articles

Prof. John Marsden (Editor-in-Chief, Addiction). Discussant: *Dr. Ludovic van Amelsvoort* (Associate Editor, Journal of Clinical Epidemiology). Short presentation followed by discussion: in scientific writing, AI can be used in an ethical way, but the difference between proper use and for example plagiarism, can be difficult to detect. Are journal editors afraid that many articles become fabricated in the era of AI? What measures can be taken to prevent this?

We are looking forward to meeting you!

Prof. Daniel Kotz (chs) & Dr. Mark Spigt (CAPHRI)
